venit tibi adde vnū nūz adaliū et media et habebis
dyametz equatā Del sic sine nūis vide cū virga dya-
metz vtiusp fundi vasis scdm duas si placet dras scz
a sursū ad deorsū et a sinistro ad dextz Et semp duaz
sibi correlatiaz dyametz cōsidā vnā adaltm excessū
Et cūbet excessus accipe medietatē et sup dyametz
mōre correlatiaz sui gnis adde et erit dyameter vas
scdm fundā ipi equata Deinde inde cria pyasis ori-
ficii dyametz eius in medio et inde itm excessū hui dya
met ad dyametz fundoz vasis eqtā Et silit medietē
hui excessus adde sup dyametz fundoz vas equati
eritq tōlit vas eqtē ac si cēt vndiq colupnare Z De
inde myeias aream cūli tali mō sēbe dyametz equata
i duob loris et i vno loco i ytias septias ptē illi dyamet
quā notabis Deinde talio loco multiplica dyametz eā
tā p tria et adde illi septias ptē et habebis aream cūli
scilicz fundi vasis equati Deinde accipe lōgitudinez
vasis p nūz puctoz baculi quā lōgitudiez multiplica p
aream fundi vasis equati et veniet tibi qntitas puctoz
tocī quā qntitatē diuide p 1000 qa 1000 cōtinet m
cubico tali cuius io radix et nūs qies oīdit tibi sco-
pas illi vasis Et si aliq manet i residuo hoc debz ppo
cōnari ad dimidia stopā uel ad qrtale uel adoctale
scdm q nūs se extendit tali mō q a nūo infra-
millenariū subtrahet si pt dimidia stopa et illa sig-
net postea itm subtrahat si pt vnū qrtale z sic d alijs
decet uel remanserit

|| circūferēcia cūli deinde
multiplica medietatē dyamet
p medietatē circūferēcie et
habebis aream
