esse ultimo quātitatis ps secto probat. hec ꝙ quātitas multiplicato decessit que ante sectionē secato treō scendit. Sed discreto quantitas multitudo appellat ꝙ ab unitate incipiēs qua nichil minus est ꝙ in ipō finmato ad maius infinabilis repit nullus ei ac scendi finis occurit occurrit. sed in infinito p mūs multiplicato procedit. q mū cū ad minore modū ui deant finiti / infinitate admittit cū accrescit / sūt ꝙ horū quātitatuz proprietates ꝯie. altera ei multiplicata. in quātitate decrescit / altera quātitatis pcipit augmentuz. Sed qa cuiqne crescēdi finē nōn pt in crescendi infinitate queniit. Et qm discreta quātitas ꝙ mūs est / nō numerate supius sonoꝝ ut uocū ḡuctiones qa sine mūs esse nō pōssut ad ipam quantitate discretaz necessario reducitur. Et quia ut dictuz est huiusmōi quātitas in infinitū augmentabilis est / ideo ipe uocū ḡnexiones in infinitū augmentari possūt & multiplicari. qa sicut ex mū additione numeralis quātitas in infinitū auget. sic ex tonoꝝ & semitoniorū augmentatione efficitur diapēte ut diatessaron. re ex diatessaron & diapēte ḡuctione diapason que diapason ꝙ sonꝝ duplicato / bisdiapason efficit symphonia. re sic in infinitū si fieret progressio / multiplicate uocū erūt ḡnexiones. Et qm multiplicitū diuersoꝝ
